**SYNCHRONIZED STAGING TRANSFER**

The **NEW Propack PSST/120** is an economical, safe product delivery system that empowers the use of stepper servo technology to receive randomly presented products from baggers, pouchers and flow wrappers and synchronizes product delivery on-time, on demand to high speed cartoning machines or other downstream equipment.

# PROPACK

# PSST/120

## SYNCHRONIZED STAGING TRANSFER

*This product synchronization is accomplished by intelligently monitoring and phasing products (bags, pouches, wrapped snacks, etc.) on a number of motion-controlled staging sections to either a single or dual product transfer module.*

### **Features:**

*Configures to user-defined requirements accommodating either single, double or multi-pack formats*

*Flexible capability of handling product ranges from 4" up to 16" in length*

*Precise product speed and position control*

*Wide stage area for accommodating bag widths up to 8"*

*Rugged, sanitary stainless-steel frame design*

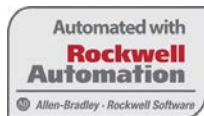

*Optional pass through capability for bulk packing or WIP presentation*

*Internally illuminated, fully guarded transfer and synchronizing staging section*

*Multi-axis integrated on-board Servo-Stepper Drive control*

*Maximum product rates of 120 PPM (single), 80 twin packs per minute (product size dependent)*

### *Partner Companies:*

## THE POWER OF PERFORMANCE

Founded in 1996, **Propack** is an industry specialist in high-speed collation and robotic loading of wrapped products. Over 100 machines are in operation, and 80% of our business comes from repeat customers.

**Propack's** line of Slab Forming, Slitting & Spreading, and Bar Cutting equipment plus our bar Distribution Conveyor Systems round-out our front-to-back systems capabilities.

**Propack** also provides System Integration expertise for Primary and Secondary packaging operations.
